

Sirajul Islam

SQA Engineer

Dhaka, Bangladesh | shirajulislamparvez@gmail.com | +880-1318402075
linkedin.com/in/siraajul | github.com/siraajul | siraajul.com

PROFESSIONAL SUMMARY

SQA Engineer with 2+ years of hands-on experience in manual, API, and automation testing across web and mobile applications. Identified 90+ pre-release defects and contributed to a 25% reduction in post-launch issues across Shopify, WooCommerce, and mobile platforms. Comfortable with the full STLC — from writing test plans to closing defects in sprint cycles.

TECHNICAL SKILLS

Testing :	Manual, Functional, Regression, Smoke, Exploratory, API, Performance, Security (Functional), UI Automation, UAT, Cross-browser, Mobile
Automation :	Playwright, Jest, Postman, Newman
Performance :	JMeter, K6
Tools :	Chrome DevTools, Git, GitHub, Jira, ClickUp, Notion, CI/CD
Languages :	JavaScript, Java, Python, SQL, HTML, CSS, JSON, Dart
Platforms :	Shopify, WooCommerce, Web, Android, iOS
Methodologies :	SDLC, STLC, Agile, Scrum, BVA, Equivalence Partitioning, Decision Table, Defect Lifecycle Management, Test Planning

WORK EXPERIENCE

SQA Engineer OmniDevX Studio	Mar 2026 - Present Remote, Part-Time
- Conducting functional UI and security testing on a security-focused mobile app covering bodyguard booking, encrypted messaging, and live location tracking across 30+ critical user journeys. - Validating session security, access control, data integrity, and permission handling across core authentication and booking workflows. - Documenting structured defect reports and test results aligned to client-defined security acceptance criteria.	
Software QA Engineer GeekSSort	May 2025 - Nov 2025 Dhaka, Bangladesh
- Executed functional, regression, and exploratory testing across Shopify and WooCommerce storefronts during sprint cycles — identified and documented 90+ defects prior to release. - Validated checkout flows, payment gateway API responses, Liquid template rendering, and plugin/theme compatibility; contributed to a 25% reduction in post-release production issues. - Built and maintained a 250+ test case library covering critical e-commerce workflows including cart, checkout, account management, and search.	
Software Engineer (QA Focus) TripNao	Mar 2024 - Oct 2024 Dhaka, Bangladesh
- First engineer at an early-stage travel startup — owned end-to-end quality validation for both website and mobile app covering onboarding, booking, and core user interaction flows. - Prevented multiple production-critical issues by identifying high-risk functional and edge-case defects before launch; defined test strategy and wrote test plans for MVP release. - Company operations concluded following the 2024 Bangladesh political disruption.	

Mobile Developer Intern

Astha IT

Nov 2023 - Feb 2024

Dhaka, Bangladesh

- Built a Flutter-based restaurant booking application independently — 20 UI screens with full REST API integration.
- Verified data flow, API response accuracy, and error handling through functional and integration testing across positive and negative scenarios.

PROJECTS

TestFolio | Manual Test Suite | SauceDemo | ISTQB Format

- Designed 48 test cases using Boundary Value Analysis, Equivalence Partitioning, and Decision Table techniques across 5 modules.
- Identified and documented 12 reproducible defects in ISTQB-standard bug report format with severity, priority, and reproduction steps.

PayGuard | Automated Payment Validation | Jest

- Built Jest test suite covering business logic, boundary value analysis, and type-checking for payment threshold processing with full edge-case coverage.

TheCatAPI | API Testing Suite | Postman

- Designed positive, negative, boundary, and auth test scenarios across multiple endpoints; automated assertions for status codes, response schemas, and data integrity.

Shopify UI Quality Audit | Cross-device UI/UX Audit

- Performed design-vs-implementation audit across 5+ device viewports and 3 browsers; documented layout, spacing, responsiveness, and component rendering defects with screenshots.

EDUCATION

B.Tech in Computer Science

2022

Lovely Professional University, Punjab, India

Major: Software Methodologies and Testing

Co-Authored and Published 1 research paper on Cloud Computing.
